GENERAL RADIO
EXPERIMENTER

VOLUMES 30 and 31
JUNE, 1955 through MAY, 1957

GENERAL RADIO COMPANY
275 MASSACHUSETTS AVENUE
CAMBRIDGE 39 MASSACHUSETTS

Printed in U.S.A.

INDEX BY TITLE

A 120-Cycle Source for Electrolytic Capacitor Testing with the Capacitance Test Bridge (August, 1956)

A 400-Cycle Variac® with 20-Ampere Rating (January, 1957)

Accurate Voltage Divider for DC and Audio Frequencies, An (Ivan G. Easton: August, 1955)

Air Capacitor, Type 1420 Variable (H. M. Wilson: July, 1956)

Aircraft Fuel Gages, A Calibrator for (P. K. McElroy: September, 1955)

Amplitude Comparison, A New Circuit for (M. C. Holtje: November, 1955)

An Engineer's Company (May, 1957)

Audio-Frequency Impedance Measurement, A New Approach to (Ivan G. Easton, Horatio W. Lamson: July, 1955)

Audio-Frequency Voltmeter and Amplifier, The Sound-Level Meter as an (E. E. Gross: January, 1957)

Automatic Data Display (December, 1956)

Autotransformer, The Type W5 Variac®- A New and Better Variable (December, 1955)

Automatic X-Y Plotting, Synchronous Dial Drives for (G. A. Clemow: August, 1956)

Balun Accessories, New Coaxial Elements (August, 1955)

Bridge, A 120-Cycle Source for Electrolytic Capacitor Testing with the Capacitance Test (August, 1956)

Bridge Assembly for Measurements at One Megacycle, Capacitance (February, 1957)

Bridge Features Small Size and Added Operating Convenience, New R-F (R. A. Soderman: June, 1955)

Bridge, The Type 1603-A Z-Y (Ivan G. Easton, Horatio W. Lamson: July, 1955)

Cable Characteristics, The Measurement of (W. R. Thurston: May, 1957)

Calibrator, An Improved Sound-Level (E. E. Gross: June, 1955)

Calibrator for Aircraft Fuel Gages, A (P. K. McElroy: September, 1955)

Calibrator for Frequency and Time, A High-Precision (R. W. Frank, F. D. Lewis: June, 1956)

Capacitance Bridge Assembly for Measurements at One Megacycle (February, 1957)

Capacitance Test Bridge, A 120-Cycle Source for Electrolytic Capacitor Testing with the (August, 1956)

Capacitor Testing with the Capacitance Test Bridge, A 120-Cycle Source for Electrolytic (August, 1956)

Capacitor, Type 1420 Variable Air (H. M. Wilson: July, 1956)

Capacitors, A Convenient Test Fixture for Small (October, 1955)

Capacitors with Mica and Paper Dielectrics, Decade (July, 1956)

Capacitors with Polystyrene Dielectric, New Decade (July, 1956)

Chairman Honored (May, 1956)

Circuit for Amplitude Comparison, A New (M. C. Holtje: November, 1955)

Coaxial Elements, New (August, 1955)

Coaxial Elements, New - Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)

Coaxial Parts, More New (September, 1955)

Comparator, A High-Precision Impedance (M. C. Holtje, Henry P. Hall: April, 1956)

Constant-Power Factor, Variable Current Load, The Variac® as a Means of Providing (November, 1955)

Convenient Test Fixture for Small Capacitors, A (October, 1955)

Correction - Type 1219-A Unit Pulse Amplifier (September, 1955)

Data Display, Automatic (December, 1956)

Decade Capacitors with Mica and Paper Dielectrics (July, 1956)

Decade Capacitors with Polystyrene Dielectric, New (July, 1956)

Delay Line, A New Type of Variable (F. D. Lewis, Robert M. Frazier: October, 1956)

Delta Circuits, Variacs in Three Phase (October, 1955)

Design of Iron-Cored Chokes Carrying Direct Current, The (P. K. McElroy: March, 1957)

Dial Drives for Automatic X-Y Plotting, Synchronous (G. A. Clemow: August, 1956)

Direct Current, The Design of Iron-Cored Chokes Carrying (P. K. McElroy: March, 1957)

Distributor For Israel, New (July, 1955)

Double Pulses with the Type 1391-A Pulse, Sweep, and Time-Delay Generator (R. W. Frank: April, 1957)

Drives for Automatic X-Y Plotting, Synchronous Dial (G. A. Clemow: August, 1956)

Duty Cycle, Variac® Ratings (Gilbert Smiley: November, 1956)

Electrolytic Capacitor Testing with the Capacitance Test Bridge, A 120-Cycle Source for (August, 1956)

Electrometer, A New, High-Sensitivity (A. G. Bousquet: March, 1956)

Engineer's Company, An (May, 1957)

Filter For Use in Capacitance Measurements at One Megacycle, A Tuned (Henry P. Hall: January, 1956)
Fixture for Small Capacitors, A Convenient Test (October, 1955)
Frequency and Time, A High-Precision Calibrator for (R. W. Frank, F. D. Lewis: June, 1956)
Fuel Gages, A Calibrator for Aircraft (P. K. McElroy: September, 1955)
High Power with Low Distortion (January, 1956)
High-Precision Calibrator for Frequency and Time, A (R. W. Frank, F. D. Lewis: June, 1956)
High-Precision Impedance Comparator (M. C. Holtje, Henry P. Hall: April, 1956)
High-Sensitivity Electrometer, A New (A. G. Bousquet: March, 1956)
Impact Noise, The Measurement of (Arnold P. G. Peterson: February, 1956)
Impedance Comparator, A High-Precision (M. C. Holtje, Henry P. Hall: April, 1956)
Impedance Measurement, A New Approach to Audio-Frequency (Ivan G. Easton, Horatio W. Lamson: July, 1955)
Improved Sound-Level Calibrator, An (E. E. Gross: June, 1955)
Improved Unit Crystal Oscillator Now Available (September, 1955)
Inductors - A Stability Record, Standard (May, 1957)
Ingredient of Quality, An (P. W. Powers: January, 1956)
Iron-Cored Chokes Carrying Direct Current, The Design of (P. K. McElroy: March, 1957)
Line, A New Type of Variable Delay (F. D. Lewis, Robert M. Frazier: October, 1956)
Line Voltage Regulator, Militarized (M. C. Holtje: November, 1956)
Logarithmic Voltmeter, The Sound-Level Meter as an Audio-Frequency Voltmeter and Amplifier (E. E. Gross: January, 1957)
Los Altos - New GR Office at (February, 1957)
Low-Cost Microwave Signal Source, A (Benedict O'Brien, R. A. Soderman: March, 1956)
Measurement of Cable Characteristics, The (W. R. Thurston: May, 1957)
Measurement of Impact Noise, The (Arnold P. G. Peterson: February, 1956)
Measurements at One Megacycle, Capacitance Bridge Assembly for (February, 1957)
Mica and Paper Dielectrics, Decade Capacitors with (July, 1956)
Microwave Signal Source, Low-Cost (Benedict O'Brien, R. A. Soderman: March, 1956)
Militarized Line-Voltage Regulator (M. C. Holtje: November, 1956)
Monitor, New Television Transmitter (C. A. Cady: September, 1956)
More New Variacs (May, 1956)
Motor Drives for W-Series Variacs (August, 1956)
New Circuit for Amplitude Comparison, A (M. C. Holtje: November, 1955)
New Coaxial Elements (August, 1955)
New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
New Coaxial Parts (September, 1955)
New Decade Capacitors with Polystyrene Dielectric (July, 1956)
New Dial Brings New Convenience to Octave-Band Noise Measurements (J. J. Faran, Jr.: March, 1956)
New Distributor for Israel (July, 1955)
New GR Office at Los Altos for San Francisco Bay Area (February, 1957)
New High-Sensitivity Electrometer, A (A. G. Bousquet: March, 1956)
New Models of the "Stripped-Down" Variac® Speed Controls (W. N. Tuttle: January, 1956)
New Philadelphia Office (July, 1955)
New Pulse Amplifier Increases Utility of Unit Pulser (R. W. Frank: July, 1955)
New R-F Bridge Features Small Size and Added Operating Convenience (R. A. Soderman: June, 1955)
New "50" Size Variacs - Types W50 and W50H (G. Smiley: April, 1957)
New Television Transmitter Monitor (C. A. Cady: September, 1956)
New Type of Variable Delay Line (F. D. Lewis, Robert M. Frazier: October, 1956)
New Type 1800-B Vacuum-Tube Voltmeter - Stable and Accurate, The (C. A. Woodward, Jr.: September, 1956)
New Variac® Speed Controls in 1 and 1½ hp Ratings (W. N. Tuttle: October, 1955)
Noise, Response of Peak Voltmeters to Random (Arnold P. G. Peterson: December, 1956)
Noise, The Measurement of Impact (Arnold P. G. Peterson: February, 1956)
Octave-Band Noise Measurements, New Dial Brings New Convenience to (J. J. Faran, Jr.: March, 1956)
Other Branch Office Changes (July, 1955)
Paper Dielectrics, Decade Capacitors with Mica and (July, 1956)
Peak Voltmeters to Random Noise, Response of (Arnold P. G. Peterson: December, 1956)

Phase Monitoring System (S. A. Olsen: September, 1955)
Philadelphia Office, New (July, 1955)
Plotting, Synchronous Dial Drives for Automatic X-Y (G. A. Clemow: August, 1956)
Polystyrene Dielectric, New Decade Capacitors with (July, 1956)
Power Cord, Three-Wire (February, 1957)
Power Supply for Unit Instruments, A Regulated (July, 1955)
Presidents - Old and New (May, 1956)
Pulse Amplifier Increases Utility of Unit Pulser, New (R. W. Frank: July, 1955)
Pulse Generator - A Versatile Generator for Time-Domain Measurements (R. W. Frank: May, 1956)
Pulses with the Type 1391-A Pulse, Sweep, and Time-Delay Generator, Double (R. W. Frank: April, 1957)
Quality, An Ingredient of (P. W. Powers: January, 1956)
Random Noise, Response of Peak Voltmeters to (Arnold P. G. Peterson: December, 1956)
Ratings Vs. Duty Cycle, Variac® (Gilbert Smiley: November, 1956)
Recorder Coupling for the Beat Frequency Audio Generator (July, 1956)
Recorder, Type 651 - Stroboscopic Photograph of a Balloon Pierced by a Rifle Bullet (December, 1955)
R-F Bridge Features Small Size and Added Operating Convenience, New (R. A. Soderman: June, 1955)
Regulated Power Supply for Unit Instruments (July, 1955)
Regulator, Militarized Line Voltage (M. C. Holtje: November, 1956)
Response of Peak Voltmeters to Random Noise (Arnold P. G. Peterson: December, 1956)
Richmond, H. B., Chairman Honored (May, 1956)
San Francisco Office, New (February, 1957)
Signal Source, A Low-Cost Microwave (Benedict O'Brien, R. A. Soderman: March, 1956)
Some Bullet! (November, 1955)
Sound-Level Calibrator, An Improved Sound-Level (E. E. Gross: June, 1955)
Sound-Level Meter as an Audio-Frequency Voltmeter and Amplifier, The (E. E. Gross: January, 1957)
Sound-Survey Meter as a Transfer Standard, The (April, 1957)
Speed Controls in 1 and 1½ hp Ratings, New Variac® (W. N. Tuttle: October, 1955)
Speed Controls, New Models of the "Stripped-Down" Variac® (W. N. Tuttle: January, 1956)
Stability Record - Standard Inductors, A (May, 1957)
Standard Inductors, a Stability Record - (May, 1957)
Standard, The Sound-Survey Meter as a Transfer (April, 1957)
"Stripped-Down" Variac® Speed Controls, New Models of the (W. N. Tuttle: January, 1956)
Sweep Drives - Automatic Data Display (December, 1956)
Sweep-Time Generator, A Versatile Generator for Time Domain Measurements (R. W. Frank: May, 1956)
Synchronous Dial Drives for Automatic X-Y Plotting (G. A. Clemow: August, 1956)
Television Transmitter Monitor, New (C. A. Cady: September, 1956)
Test Fixture for Small Capacitors, A Convenient (October, 1955)
Three-Phase Delta Circuits, Variacs in (October, 1955)
Three-Wire Power Cord (February, 1957)
Time, A High-Precision Calibrator for Frequency and (R. W. Frank, F. D. Lewis: June, 1956)
Time-Delay Generator - A Versatile Generator for Time Domain Measurements (R. W. Frank: May, 1956)
Transfer Standard, The Sound-Survey Meter as a (April, 1957)
Transmitter Monitor, New Television (C. A. Cady: September, 1956)
Tuned Filter for Use in Capacitance Measurements at One Megacycle, A (Henry P. Hall: January, 1956)
Type 1419-A Decade Capacitor (July, 1956)
Type 1420 Variable Air Capacitor (H. M. Wilson: July, 1956)
Type 1603-A Z-Y Bridge (Ivan G. Easton, Horatio W. Lamson: July, 1955)
Unit Crystal Oscillator Now Available, Improved (September, 1955)
Unit Instruments, A Regulated Power Supply for (July, 1955)
Unit Pulser, New Pulse Amplifier Increases Utility of (R. W. Frank: July, 1955)
Vacuum-Tube Voltmeter, The New Type 1800-B - Stable and Accurate (C. A. Woodward, Jr.: September, 1956)
Variable Air Capacitor, Type 1420 (H. M. Wilson: July, 1956)
Variable Autotransformer, The Type W5 Variac® - A New and Better (December, 1955)
Variable Delay Line, A New Type of (F. D. Lewis, Robert M. Frazier: October, 1956)
Variac® - A New and Better Variable Autotransformer, The Type W5 (December, 1955)

Variac® as a Means of Providing Constant-Power Factor, Variable Current Load (November, 1955)
Variac® Ratings Vs. Duty Cycle (Gilbert Smiley: November, 1956)
Variac® Speed Controls in 1 and 1½ hp Ratings, New (W. N. Tuttle: October, 1955)
Variac® Speed Controls, New Models of the "Stripped-Down" (W N. Tuttle: January, 1956)
Variac® with 20-Ampere Rating, A 400-Cycle (January, 1957)
Variacs in Three-Phase Delta Circuits (October, 1955)
Variacs, More New (May, 1956)
Variacs, Motor Drives for W-Series (August, 1956)
Variacs - Types W50 and W50H, New "50" Size (G. Smiley: April, 1957)
Versatile Generator for Time-Domain Measurements (R. W. Frank: May, 1956)
Voltage Divider for DC and Audio Frequencies, An Accurate (Ivan G. Easton: August, 1955)
Voltage Regulator, Militarized Line (M. C. Holtje: November, 1956)
Voltmeter and Amplifier, The Sound-Level Meter as an Audio-Frequency (E. E. Gross: January, 1957)
Voltmeter, The New Type 1800-B Vacuum-Tube - Stable and Accurate (C. A. Woodward, Jr.: September, 1956)
W-Series Variacs, Motor Drives for (August, 1956)
X-Y Plotting, Synchronous Dial Drives for Automatic (G. A. Clemow: August, 1956)
Z-Y Bridge, The Type 1603-A (Ivan G. Easton, Horatio W. Lamson: July, 1955)

INDEX BY INSTRUMENT TYPE NUMBER

Type CAP-15 3-Wire Power Cord - Three-Wire Power Cord (February, 1957)
Type M2 Variac® - More New Variacs (May, 1956)
Type M5 Variac® - More New Variacs (May, 1956)
Type M20 Variac® - A 400-Cycle Variac® with 20-Ampere Rating (January, 1957)
Type V-2 Variac® - Phase Monitoring System (S. A. Olsen: September, 1955)
Type W2 Variac® - More New Variacs (May, 1956)
Type W2 Variac® - Motor Drives for W-Series Variacs (August, 1956)
Type W5 Variac® - A New and Better Variable Autotransformer (December, 1955)
Type W5 Variac® - Motor Drives for W-Series Variacs (August, 1956)
Types W50 and W50H Variacs - New "50" Size Variacs (G. Smiley: April, 1957)
Type 314-S86 Variable Delay Line - A New Type of Variable Delay Line (F. D. Lewis, Robert M. Frazier: October, 1956)
Type P-579 Field Variable Capacitance Tester - Calibrator for Aircraft Fuel Gages (P. K. McElroy: September, 1955)
Type 651 Recorder - Stroboscopic Photograph of Bullet in Flight (October, 1955)
Type 874-A3 Coaxial Cable - New Coaxial Elements (August, 1955)
Type 874-BM 300-Ohm Balanced Termination - New Coaxial Elements (August, 1955)
Type 874-C Cable Connector - More New Coaxial Parts (September, 1955)
Type 874-C8 Cable Connector - More New Coaxial Parts (September, 1955)
Type 874-C9 Cable Connector - More New Coaxial Parts (September, 1955)
Type 874-C58 Cable Connector - More New Coaxial Parts (September, 1955)
Type 874-C62 Cable Connector - More New Coaxial Parts (September, 1955)
Type 874-F2000 Low-Pass Filter - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
Type 874-F4000 Low-Pass Filter - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
Type 874-G3 Fixed Attenuator - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
Type 874-G6 Fixed Attenuator - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
Type 874-G10 Fixed Attenuator - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
Type 874-G20 Fixed Attenuator - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
Type 874-LK10 10-Cm Constant Impedance Adjustable Line - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
Type 874-LT Trombone Constant Impedance Adjustable Line - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)

Type 874-PB Panel Connector - More New Coaxial Parts (September, 1955)

Type 874-PB8 Panel Connector - More New Coaxial Parts (September, 1955)

Type 874-PB9 Panel Connector - More New Coaxial Parts (September, 1955)

Type 874-PB58 Panel Connector - More New Coaxial Parts (September, 1955)

Type 874-PB62 Panel Connector - More New Coaxial Parts (September, 1955)

Type 874-QLJ Adaptor to UG 154/U or A/U Type LC Connector - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)

Type 874-QLP Adaptor to UG 352A/U Type LC Connector - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors (April, 1956)

Type 874-QU1 Adaptor to 7/8", 50-Ohm, UHF Line - More New Coaxial Parts (September, 1955)

Type 874-QU2 Adaptor to 1 5/8", 50- Ohm, UHF Line - More New Coaxial Parts (September, 1955)

Type 874-R22 Patch Cord - New Coaxial Elements (August, 1955)

Type 874-UB-P2 Balun Terminal Unit - New Coaxial Elements (August, 1955)

Type 874-UB-P3 300-Ohm Balun Terminal Pad - New Coaxial Elements (August, 1955)

Type 874-VQ Voltmeter Detector - New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)

Type 874-W100 100-Ohm Coaxial Standard - New Coaxial Elements (August, 1955)

Type 874-W200 200-Ohm Coaxial Standard - New Coaxial Elements (August, 1955)

Type 907-R X-Y Dial Drive - Synchronous Dial Drives for Automatic X-Y Plotting (G. A. Clemow: August, 1956)

Type 908-R X-Y Dial Drive - Synchronous Dial Drives for Automatic X-Y Plotting (G. A. Clemow: August, 1956)

Type 942-A Output Transformer - High Power with Low Distortion (January, 1956)

Type 980 Decade Capacitors - New Decade Capacitors with Polystyrene Dielectric (July, 1956)

Type 1184-A Television Transmitter Monitor - New Television Transmitter Monitor (C. A. Cady: September, 1956)

Type 1212-P2 One-Megacycle Filter - A Tuned Filter for Use in Capacitance Measurements at One Megacycle (Henry P. Hall: January, 1956)

Type 1213-AB Unit Crystal Oscillator - Improved Unit Crystal Oscillator Now Available (September, 1955)

Type 1213-C Unit Time/Frequency Calibrator - A High-Precision Calibrator for Frequency and Time (R. W. Frank, F. D. Lewis: June, 1956)

Type 1213-P1 Differentiator - A High-Precision Calibrator for Frequency and Time (R. W. Frank, F. D. Lewis: June, 1956)

Type 1214-AS2 Unit Oscillator - A 120-Cycle Source for Electrolytic Capacitor Testing with the Capacitance Test Bridge (August, 1956)

Type 1219-A Unit Pulse Amplifier - New Pulse Amplifier Increases Utility of Unit Pulser (R. W. Frank: July, 1955)

Type 1219-A Unit Pulse Amplifier - Correction (September, 1955)

Type 1220-A Unit Klystron Oscillator - A Low-Cost Microwave Signal Source (Benedict O'Brien, R. A. Soderman: March, 1957)

Type 1230-A D-C Amplifier and Electrometer - A New, High-Sensitivity Electrometer (A. G. Bousquet: March, 1956)

Type 1304-B Beat-Frequency Audio Generator - Recorder Coupling for the Beat-Frequency Audio Generator (July, 1956)

Type 1391-A Pulse, Sweep, and Time-Delay Generator - A Versatile Generator for Time-Domain Measurements (R. W. Frank: May, 1956)

Type 1391-A Pulse, Sweep, and Time-Delay Generator - Double Pulses with (R. W. Frank: April, 1957)

Type 1419-A Decade Capacitor (July, 1956)

Type 1420 Variable Air Capacitor (H. M. Wilson: July, 1956)

Type 1454-A Decade Voltage Divider - An Accurate Voltage Divider for DC and Audio Frequencies (Ivan G. Easton: August, 1955)

Type 1482 Standard Inductor (May, 1957)

Type 1551-A Sound-Level Meter - The Sound-Level Meter as an Audio-Frequency Voltmeter and Amplifier (E. E. Gross: January, 1957)

Type 1552-B Sound-Level Calibrator - An Improved Sound-Level Calibrator (E. E. Gross: June, 1955)

Type 1556-A Impact Noise Analyzer - The Measurement of Impact Noise (Arnold P. G. Peterson: February, 1956)

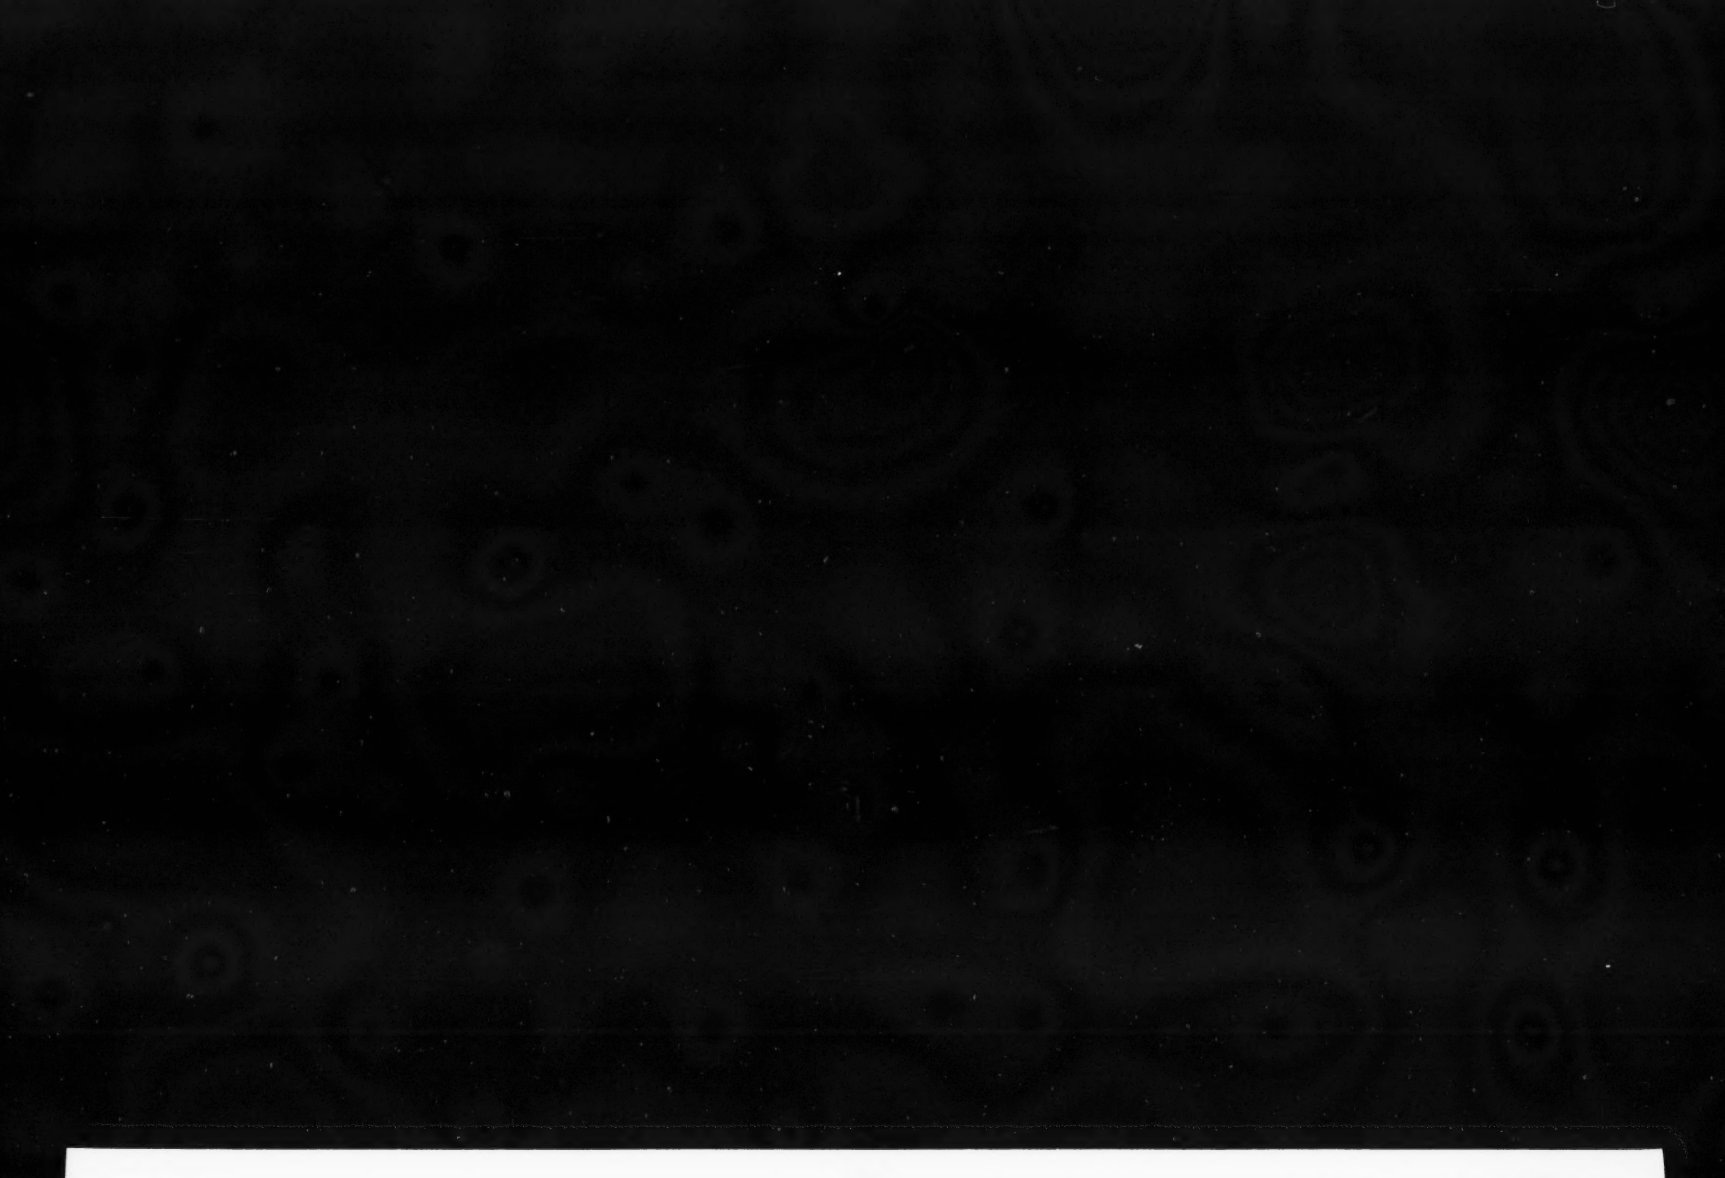
Type 1570-ALS15 Automatic Voltage Regulator - Militarized Line Voltage Regulator (November, 1956)

Type 1603-A Z-Y Bridge (Ivan G. Easton, Horatio W. Lamson: July, 1955)

Type 1605-A Impedance Comparator - A High-

Precision Impedance Comparator (M. C. Holtje, Henry P. Hall: April, 1956)
Type 1606-A Radio-Frequency Bridge - New R-F Bridge Features Small Size and Added Operating Convenience (R. A. Soderman: June, 1955)
Type 1610-AK Capacitance Measuring Assembly - Capacitance Bridge Assembly for Measurements at One Megacycle (February, 1957)
Type 1611-AS2 Capacitance Test Bridge - A 120-Cycle Source for Electrolytic Capacitor Testing with the Capacitance Test Bridge (August, 1956)
Type 1691-A Capacitor Test Fixture - A Convenient Test Fixture for Small Capacitors (October, 1955)
Type 1700-CW Variac® Speed Controls - New Models of the "Stripped-Down" Variac® Speed Controls (January, 1956)
Type 1702-BW Variac® Speed Controls - New Models of the "Stripped-Down" Variac® Speed Controls (January, 1956)
Type 1702-M Motor Control - Close-out Sale of (July, 1956)
Type 1703-BW Variac® Speed Controls - New Models of the "Stripped-Down" Variac® Speed Controls (January, 1956)
Type 1704-B Variac® Speed Control - New Variac® Speed Controls in 1 and 1½ hp Ratings (W. N. Tuttle: October, 1955)
Type 1704-BW Variac® Speed Control - New Variac® Speed Controls in 1 and 1½ hp Ratings (W. N. Tuttle: October, 1955)
Type 1705-B Variac® Speed Control - New Variac® Speed Controls in 1 and 1½ hp Ratings (W. N. Tuttle: October, 1955)
Type 1705-BW Variac® Speed Control - New Variac® Speed Controls in 1 and 1½ hp Ratings (W. N. Tuttle: October, 1955)
Type 1800-B Vacuum-Tube Voltmeter - The New Type 1800-B Vacuum-Tube Voltmeter - Stable and Accurate (C. A. Woodward, Jr.: September, 1956)

INDEX BY AUTHOR

Bousquet, A. G. - A New, High-Sensitivity Electrometer (March, 1956)
Burke, C. T. - 1915-1955 (June, 1955)
Cady, C. A. - New Television Transmitter Monitor (September, 1956)
Clemow, G. A. - Synchronous Dial Drives for Automatic X-Y Plotting (August, 1956)
Easton, I. G. - An Accurate Voltage Divider for DC and Audio Frequencies (August, 1955)
Easton, I. G., H. W. Lamson - A New Approach to Audio Frequency Impedance Measurement (July, 1955)
Faran, J. J. - New Dial Brings New Convenience to Octave-Band Noise Measurements (March, 1956)
Frank, R. W. - A Versatile Generator for Time-Domain Measurements (May, 1956) - Double Pulses with the Type 1391-A Pulse, Sweep and Time Delay Generator (April, 1957) - New Pulse Amplifier Increases Utility of Unit Pulser (July, 1955)
Frank, R. W., F. D. Lewis - A High-Precision Calibrator for Frequency and Time (June, 1956)
Frazier, R. M., F. D. Lewis - A New Type of Variable Delay Line (October, 1956)
Gross, E. E. - An Improved Sound-Level Calibrator (June, 1955) - The Sound-Level Meter as an Audio-Frequency Voltmeter and Amplifier (January, 1957)
Hall, H. P. - A Tuned Filter For Use in Capacitance Measurements at One Megacycle (January, 1956)
Hall, H. P., M. C. Holtje - A High-Precision Impedance Comparator (April, 1956)
Holtje, M. C. - A New Circuit for Amplitude Comparison (November, 1955) - Militarized Line Voltage Regulator (November, 1956)
Holtje, M. C., H. P. Hall - A High-Precision Impedance Comparator (April, 1956)
Lamson, H. W., I. G. Easton - A New Approach to Audio Frequency Impedance Measurements (July, 1955)
Lewis, F. D., R. M. Frazier - A New Type of Variable Delay Line (October, 1956)
Lewis, F. D., R. W. Frank - A High-Precision Calibrator for Frequency and Time (June, 1956)
McElroy, P. K. - A Calibrator for Aircraft Fuel Gages (September, 1955) - The Design of Iron-Cored Chokes Carrying Direct Current (March, 1957)
O'Brien, B., R. A. Soderman - A Low-Cost Microwave Signal Source (March, 1956)
Olsen, S. A. - Phase Monitoring System (September, 1955)
Peterson, A. P. G. - Response of Peak Voltmeters to Random Noise (December, 1956)
Powers, P. W. - An Ingredient of Quality (January, 1956)
Soderman, R. A. - New R-F Bridge Features Small Size and Added Operating Convenience


(June, 1955)
Soderman, R. A., B. O'Brien - A Low-Cost Microwave Signal Source (March, 1956)
Smiley, G. - New "50" Size Variacs - Types W50 and W50H (April, 1957) - Variac® Ratings Vs. Duty Cycle (November, 1956)
Thurston, W. R. - The Measurement of Cable Characteristics (May, 1957)
Tuttle, W. N. - New Models of the "Stripped-Down" Variac® Speed Controls (January, 1956) - New Variac® Speed Controls in 1 and 1½ hp Ratings (October, 1955)
Unsigned -
A 120-Cycle Source for Electrolytic Capacitor Testing with the Capacitance Test Bridge (August, 1956)
A 400- Cycle Variac® with 20-Ampere Rating (January, 1957)
A Convenient Test Fixture for Small Capacitors (October, 1955)
A Regulated Power Supply For Unit Instruments (July, 1955)
A Stability Record - Standard Inductors (May, 1957)
An Engineer's Company (May, 1957)
Automatic Data Display (December, 1956)
Capacitance Bridge Assembly for Measurements at One Megacycle (February, 1957)
Correction - Type 1219-A Unit Pulse Amplifier (September, 1955)
Decade Capacitors with Mica and Paper Dielectrics (July, 1956)
H. B. Richmond, Chairman, Honored (May, 1956)
High Power with Low Distortion (January, 1956)
Improved Unit Crystal Oscillator Now Available (September, 1955)
More New Coaxial Parts (September, 1955)
More New Variacs (May, 1956)
Motor Drives for W-Series Variacs (August, 1956)
New Coaxial Elements (August, 1955)
New Coaxial Elements, Attenuators, Filters, Line Stretchers, Detectors, Adaptors (April, 1956)
New Coaxial Parts (September, 1955)
New Decade Capacitors with Polystyrene Dielectric (July, 1956)
New Distributor for Israel (July, 1955)
New GR Office at Los Altos for San Francisco Bay Area (February, 1957)
New Philadelphia Office (July, 1955)
Other Branch Office Changes (July, 1955)
Presidents - Old and New (May, 1956)
Recorder Coupling for the Beat Frequency Audio Generator (July, 1956)
Regulated Power Supply for Unit Instruments (July, 1955)
San Francisco Office (February, 1957)
Some Bullet! (November, 1955)
Sweep Drives - Automatic Data Display (December, 1956)
The Sound-Survey Meter as a Transfer Standard (April, 1957)
The Type W5 Variac® - A New and Better Variable Autotransformer (December, 1955)
Three-Wire Power Cord (February, 1957)
Variable Current Load Variac® as a Means of Providing Constant-Power Factor (November, 1955)
Variacs in Three-Phase Delta Circuits (October, 1955)
Wilson, H. M. - Type 1420 Variable Air Capacitor (July, 1956)
Woodward, C. A. Jr. - The New Type 1800-B Vacuum-Tube Voltmeter - Stable and Accurate (September, 1956)
